APR64P Digital Fault Recorder Power Quality recorder

- 8 or 16 analog channels and 3 digital channels (expendable by adding modules)
- Accuracy 0,1% , sampling rate 6400Hz or 12800Hz
- Storage in internal memory (up to 32Go) and/or external FTP server
- High speed communication with 100BaseT Ethernet (TCP/IP)
- LED and relay outputs
- Low, high and relative thresholds on every measured and/or calculated value.
- Power (P,Q,S), cos j , tan j and frequency
- Trend mode recording : RMS Values, harmonics, power ...
- Time synchronization (internal or IRIGJ, GPS 1pps)
- Powerful application software APRWIN64
- Display of all calculated values (curves, RMS, Cos, Tan, Power).
- Measure of values with 2 cursors
- Zoom in and out, choice of scales, colors ...
- User defined templates
- Harmonics, phasors
- Voltage and current symmetrical components
- COMTRADE standard compliant
- Export to EXCEL or WORD
